

Cover home shown with Sage Creek doors, optional hardware, and Large Stockton Arch lites (S2)

THE STANDARD IN **STEEL** CARRIAGE DOORS

The original **STEELHOUSE™** Door is an innovative "Modern Carriage Door," manufactured entirely of steel. The Original **STEELHOUSE™** garage doors have two-sided steel insulated facing boards that are textured, roll formed and laminated to steel backers and then mechanically fastened and bonded to a 23 gauge steel section. A "Reinforced Integral Truss System" (RITS™) gives the Original **STEELHOUSE™** doors strength and rigidity that is unmatched by similar products. In addition to their distinctive style and curb appeal, the Original **STEELHOUSE™** (patent pending) doors are half the weight and cost of wood-en doors. Virtually maintenance-free, the Original **STEELHOUSE™** doors will not warp, crack, or split. Quite simply, it doesn't get better than that.

STEELHOUSE...Simply the Best!

The Original **STEELHOUSE™** Door is the industry's heaviest gauged steel door. Using 23 gauge steel and the RITS™ "Reinforced Integral Truss System," the Original **STEELHOUSE™** Doors strength and integrity are unmatched by similar products. Four-inch wide, two-sided steel insulated boards are bonded with epoxy cement and mechanically fastened to ensure positive attachment to the face of the door. All 2-inch thick Original **STEELHOUSE™** Doors come standard with CFC-free polystyrene insulation.
